ABOUT HEALTHSAFE

After the Christchurch earthquake in February 2011 Kevin Mc Afee, the founder of HealthSafe was caught up in managing New Zealand's largest department stores and the chaos that followed of identifying staff visitors and contractors on site After the earthquakes specific challenges around contractor governance health and safety invoice

accuracy and lone worker presented themselves and this set the need for a solution to support a business operation with a solution that we now call SecurePass

Lindt Cafe Siege

Christchurch Mosque shooting

The solution continued to have advancements based on client needs maximise business security law changes terror attacks and more recently an innovative approach to improve the user experience

At HealthSafe we are committed to Protecting Your People Your Business and Your Data

Answer 3	In the Warehouse only	☐ Correct answer
Answer 4	In their vehicle	☐ Correct answer

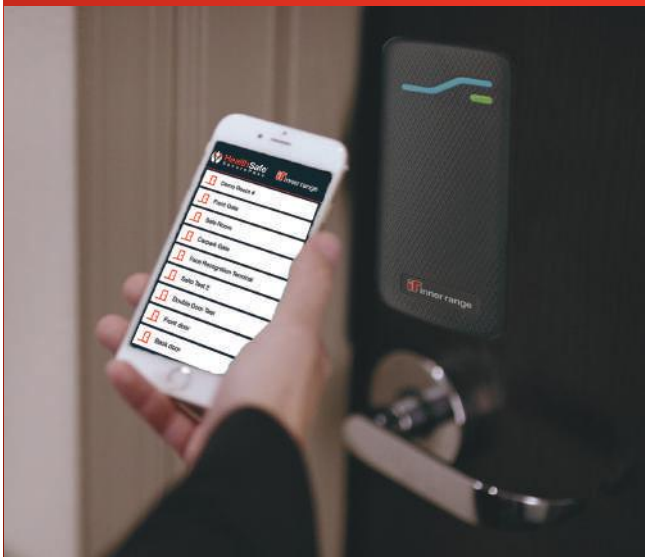

Drag and drop your Contractor Induction with questions and pass threshold Video, PowerPoint & PDF induction capability.

The Most Integrated Access Control Platform

**Contractor Access by Smartphone
After Business Requirements
Validated by SecurePass**

The high level integration between Inner Range's Integriti building management solution and HealthSafe's SecurePass suite of visitor and site management software, has created a best in class, scalable platform that can manage from smaller sites with a few employees to a fully blown, multi-site enterprise solution that ensures governance and compliance of all staff, visitors and contractors on or around the premises.

The integration provides the location with a simple and easy to use platform for signing in staff, visitors and contractors through the SecurePass software whilst in the back ground the Integriti solution is monitoring every door that has been accessed and every CCTV camera the has recorded vision. Integriti's integration to fire alarm solutions, security systems and the advanced AI analytics from surveillance systems allows it to generate actions from these defined events and send mass notifications

through SecurePass to everyone on site. If a staff member, contractor or visitor does not meet the governance or compliance requirements to be on site then SecurePass can direct Integriti to create an event and record through CCTV the actual event. Geo fencing of the site has the ability to activate the CCTV system should out of hours access to the site occur as well as having the ability to record footage of staff wandering into out of bounds areas. These are but a few examples of the extremely powerful solutions that this ground breaking integration can provide.

SECUREPASS LONE WORKER

Lone Worker Capability

! - URGENT - ! This could be critical! -

SecurePass easy-to-use Lone Worker feature communicates the location of activation and who the person is in seconds!

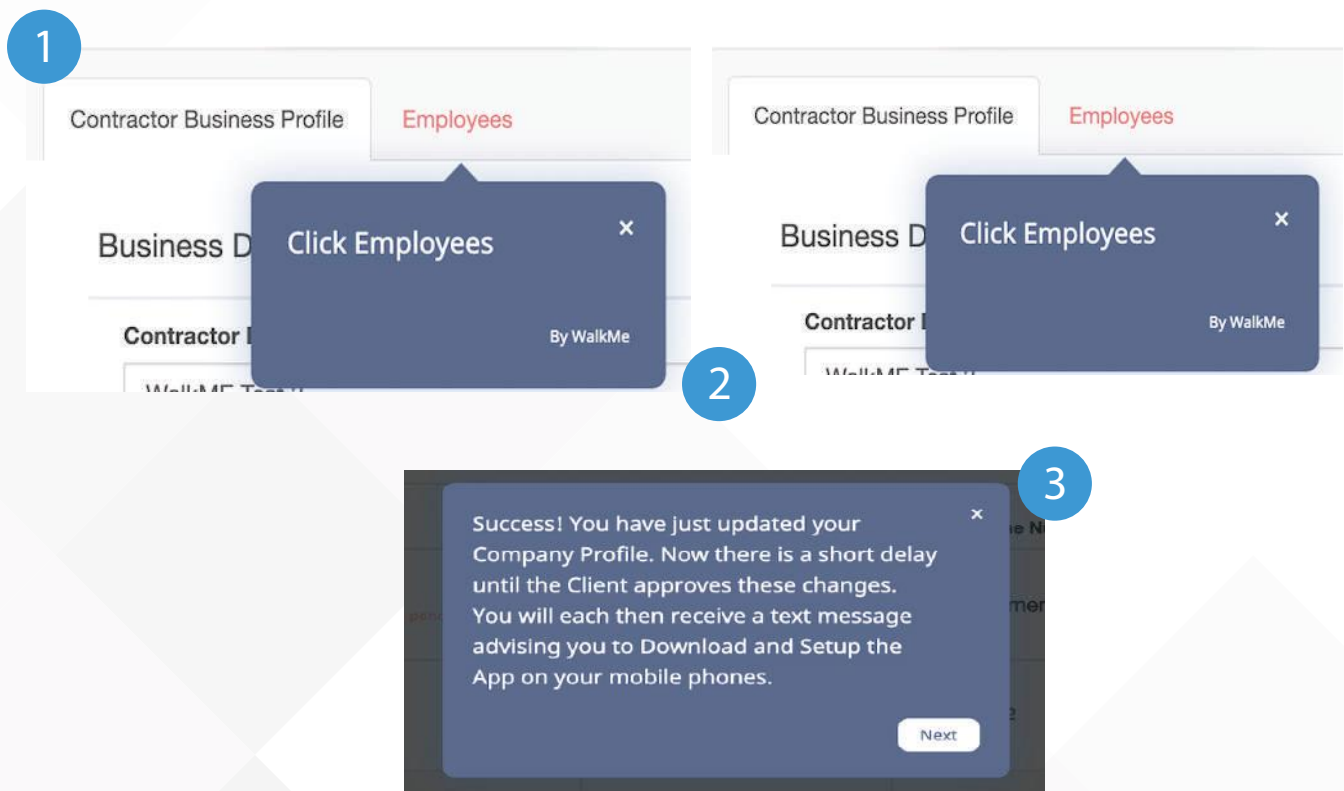

Heartbeat Monitoring Capability

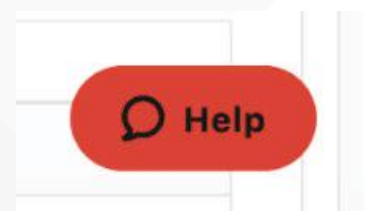

Online Support At Your Fingertips When You Need It

Different skill sets of people use the SecurePass platform and we wanted to improve the experience for all by walking you through any function or feature you wish to use or access.

As an example Selecting “Add Employee” - Walk Me takes you to the relevant page and walks you through the process with bubble prompts to Add an Employee!

Different skill sets or individuals not sure how to use or find what they are looking for can ask walk^{me} and have confidence that the system will guide them through the correct process but if you still need a friendly voice contact the HealthSafe support team by selecting “Help”.

Live Help is at the bottom right of every screen
