

Introducing the newest addition to VTech's hospitality line:

### The VTech Petite Phone™

*Proof that good things  
do come in small packages.*

When space is at a premium, the VTech Petite Phone is a perfect fit. Smaller than the standard-size guest room phone, the Petite Phone settles in discreetly. Despite its small size, it's full of features that will accommodate the most demanding guests.

Available in one- or two-line configurations with analog or SIP technology, the Petite Phone can be mounted on the wall or nightstand to maximize space. It comes with support for flash, hold, mute and conference calling so busy executives get the most from their stay.

Up to ten programmable guest service keys and a customizable faceplate allow you to highlight all the amenities and services your hotel offers. Its contemporary styling blends in with the most elegant interiors, while antibacterial plastic ensures guests and housekeeping staff are protected from germs.

The VTech Petite Phone: It makes everyone feel like a VIP.

#### Contemporary Analog Corded Petite Phone
